

Modeler 6.1.3 Release Notes

Changes since 6.1.2:

Fixed

- Inconsistencies in the user interface RWS with “delete” and “remove”
- Opposite end (Target) of a Diagram Association does not get added to the diagram layer
- Checked in libraries don't show their prerequisite dependencies
- Library.itemNamed is faulty regarding C# items

Enhancements

- Add the ability to view a list of installed patches within the Modeler
